

### Versione Originale

### Versione PM

Replica of the original transformer used on AMI - ROCK OLA - WURLITZER jukeboxes from 1962 to 1968

L-2728 and R-2777 amplifier for 6973 valves

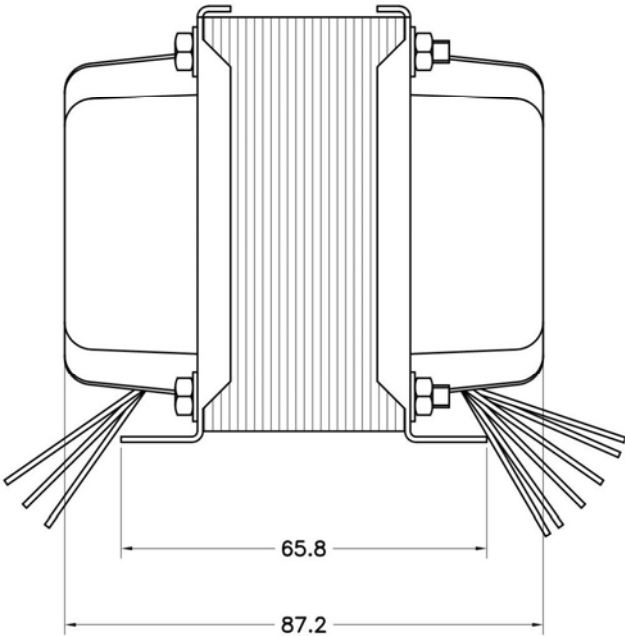

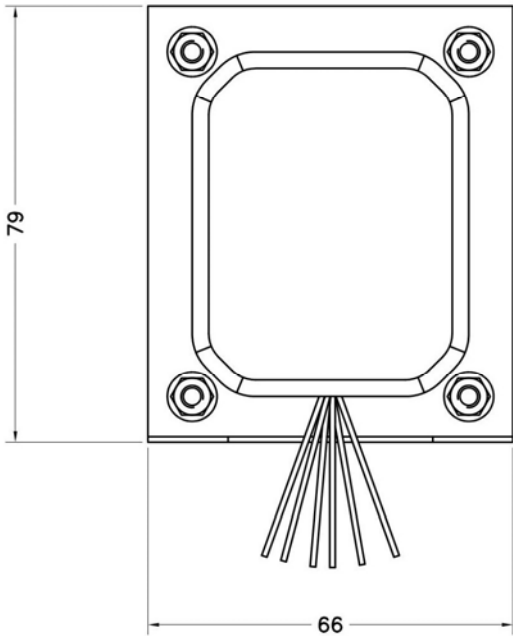

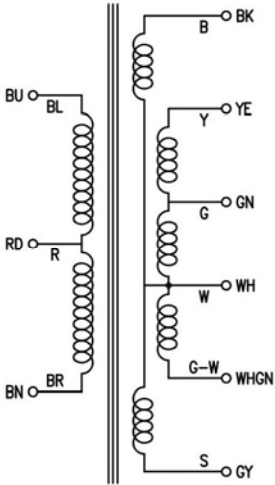

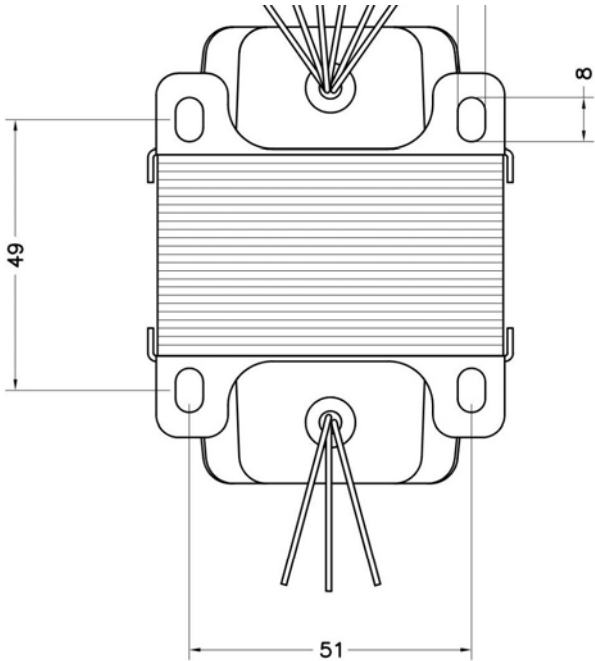

Electrically identical and mechanically compatible with the original (marked L-2729)

Primary inductance MA-BL: 55H typical @20Hz 5V / 35Henry typical @100Hz 5V

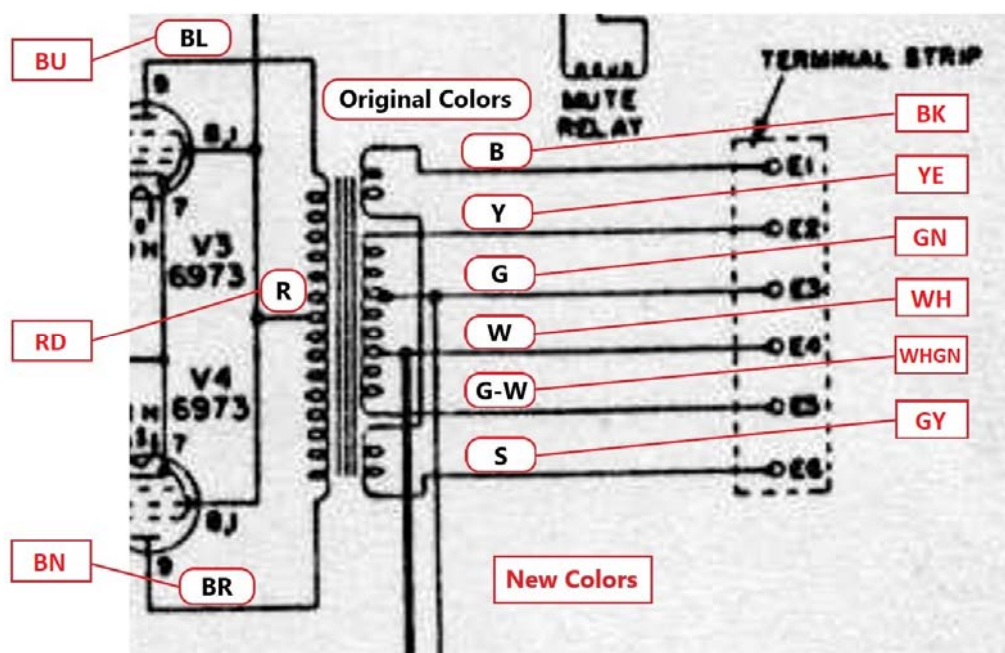

Total primary resistance 270 Ohm typical with unbalance of the two branches within 10%.

Insulation between primary and secondary: 3000Vac 50Hz 60 sec.

Circuit diagram and dimensions

Correspondence of output cable colours between original and replica (in rectangles)

#### COLOR ABBREVIATION

| Italian      | Abbreviation (IT) | Colors | Abbreviation according IEC 60757 | English      |
|--------------|-------------------|--------|----------------------------------|--------------|
| NERO         | NE                |        | BK                               | BLACK        |
| BLU          | BL                |        | BU                               | BLUE         |
| MARRONE      | MA                |        | BN                               | BROWN        |
